

THE ASMR IS PLEASED TO PRESENT

*Dr Manu Platt*

THE 2023 ASMR MEDALIST

Dr Manu Platt is the inaugural director of the US-based NIH-wide Center for Biomedical Engineering Technology Acceleration. His research addresses health disparities in the US and global health concerns. Dr Platt is dedicated to mentoring the next generation of scientists and directs Project ENGAGES- providing paid research opportunities for African-American high school students. His commitment to diversity and inclusion has earned him recognition as an Emerging Scholar by *Diverse: Issues in Higher Education* magazine.

Please join us at an ASMR Medical Research Week® Gala and the National Press Club address to hear Dr Platt speak about his inspiring work.

*"We can pull individuals from so many backgrounds and regions, with different cultural insights, challenging upbringings and grit, who, when brought together and valued, can perform truly disruptive research and advance our approaches to health, disease and treatment, across the globe"*

- MANU PLATT
