President’s Report - Dr Sarah Meachem

2016 has seen important developments in the health and medical research sector. Findings from the new report by Deloitte Access Economics, commissioned by ASMR entitled, Australian Health and Medical Research Workforce: Expert People Providing Exceptional Returns, show that investment in NHMRC has an extraordinary track record in providing the Australian community with health and economic benefits. Meaning, Australian tax payers dollars are well spent and working hard to provide the community with the outcomes they expect and deserve; increased longevity and wellbeing. The report quantifies the value of the NHMRC-funded health and medical research workforce in Australia and calculates the health and economic gains attributable to the workforce. The report was launched in Parliament House, Canberra, November 7th to a broad church of stakeholders including politicians, department officials, sponsors and supporters. This new quantitative data adds to ASMRs valuable suite of health and economic reports, that the research community have come to expect from ASMR to lead and leverage innovation in the necessary practice of evidence based policy change and design.

ASMR has observed, with growing concern over a number of years, the erosion of Australia’s health and medical research workforce. A large proportion of this workforce is supported by the National Health & Medical Research Council (NHMRC), the peak funding body for Australian health and medical research. However, five years of static investment into the NHMRC has resulted in falling grant funding rates and a decline in the NHMRC-funded workforce. This trend endangers the capacity of NHMRC investment to continue producing exceptional health and economic returns [Access Economics 2008, http://www.asmr.org.au/ExceptII08.pdf] and will equate to major negative impacts on the ability of the workforce to respond to the escalating and unsustainable healthcare crisis Australia now faces.

In brief, the key findings form the report demonstrate:

- Investment in NHMRC has generated health gains in the order of $23 billion dollars between 2000-2015. That $1 invested in NHMRC returns $3.20 showing the exceptional value of investing in NHMRC.

- Modelling of hypothetical scenarios provide evidence of the exceptional value of investing in the NHMRC-funded, productive and talented research workforce. For instance, it was revealed that if the size of the NHMRC-funded workforce expanded by 40%, a substantial increase of an $11 billion net health and economic benefit would be realised over 15 years.

- The report describe that Australia has capacity to provide greater output and benefits as a result of investing further in the NHMRC and the workforce. Future projections show by 2025, relative to the current base case (0.55%, the current NHMRC investment as a percentage of total health spend), which is expected to yield total net benefits of $17.3 billion, total net benefits increased markedly to $58.7 billion under the 3% investment model.

The Government will see this as a windfall for the country, especially in light of the fact, that the Turnbull government are committed to decreasing the national deficit and boosting the economy. The health and medical research sector is part of the answer. The workforce can contribute to reducing the burden of disease and what is more it pays dividends, in that it will mitigate the rising and unsustainable healthcare costs that Australia is now challenged with. Win Win!

In other news, there has been much activity by ASMR in influencing policy and opinion of the sector and our political pathfinders. ASMR has submitted responses to numerous Government consultations, notably the R&D Tax Incentive Review, Structural Review of the NHMRC Grant Program and, Medical Research Future Fund consultation for the development of the Australian Medical Research and Innovation Strategy and related Priorities. (visit http://www.asmr.org.au/Submissions.html)

In term of the Structural Review of the NHMRC Grant Program, ASMR has a strong stance, that the current complex NHMRC grant structure (9 different grant schemes) is unsustainable for both researchers and the NHMRC, unless there is a significant injection of investment into the NHMRC Medical Research Endowment Account (MREA). ASMRs view of the objectives of the Structural Review is to optimise support for the most number of talented researchers within the current resources of the NHMRC MREA. Without a re-structure of the NHMRC’s grant program, the majority of the sector will continue to struggle for the foreseeable future, with severe (and non-reversible in the short term) consequences for the ability of the sector to address...
present and future health challenges. The health and medical research sector is vulnerable, notably the talented pool of future leaders (early & mid-career researchers) who, in the current climate, are being lost from the sector. ASMR unreservedly feels a responsibility to ensure that 50% of the current NHMRC program supports the next generation of research leaders and has built-in mechanisms to foster succession planning so that our sector can continue to provide positive health, economic and social returns. ASMR has been, and will continue to be, actively involved in all parts of the consultation, with 2 past Presidents being members of the Expert Advisory Group.

Developments in the much anticipated MRFF have occurred also, with government consultations lead by Australian Medical Research Advisory Board, chaired by Prof Ian Frazer undertaken around the country. Sector wide discussions have been held in private forums to impact positively the MRFF strategies and priorities, for instance the aptly named MRFF: Great Expectations and Sobering Realities, at the Translational Research Institute, Brisbane. ASMR holds a strong position on the MRFF, ASMR has advocated for what’s best for the sector and for all Australians, which is why ASMR did not support the GP co-payment.

The MRFF is a tremendous initiative and once realised will become an important part of the health and medical research landscape, bringing some predictability of investment to the sector. ASMR views the MRFF in the context of the whole funding landscape of the sector. The NHMRC MREA being the bedrock (the first storey of the house) of curiosity driven research, essential to feed new knowledge and ideas into the research pipeline to translation and bringing health products to market (the objectives of the MRFF - the 2nd storey of the house). ASMR is deeply concerned that if the calls for further investment into the NHMRC MREA are ignored, investment into the MRFF will be devalued at the outset, because the very foundations of its success relies on the strong foundations of the NHMRC MREA.

The NHMRC MREA is the economic pillar to the success of the MRFF. The NHMRC MREA is under considerable pressure with the major detrimental impact being that Australia is losing its best and brightest, its non-renewable expert people and losing it enviable ability and standing as one of the world’s highest quality workforces producing exceptional returns for Australia. The sector eagerly awaits the priorities and strategies the Government will approve and the first disbursement of the MRFF ($61 million). ASMR unreservedly feels that, to ensure the best quality research and best value for tax payers money, allocation of grants must occur by an independent expert review system.

The 2016 ASMR Medical Research Week® was a resounding success with more than 40 events occurring around Australia, connecting researchers to the public, fellow scientists and key opinion leaders, to showcase the benefits of medical research. A highlight, Prof Ted Berger, the ASMR Medallist for 2016, was an exemplary example of a researcher’s dream to remedy a big global health issue-restoring memory loss through use of a brain prosthesis, in people with disorders such as dementia, Alzheimer’s and in some victims of stroke. An incredible story of bold vision. People across Australia warmed to him and saw new hope and possibilities. Thank you to all the state committees and convenors for orchestrating the events. Your diligence and passion is appreciated.

Throughout the year, incoming President and the Convenor, Dr Daniel Johnstone, of the 55th ASMR National Scientific Conference, Next Generation Healthcare-Merging Biology with Technology, November 13–15 at Bond University, Gold Coast, Queensland has put a fabulous program together. Pioneers Professor Alim-Louis Benabid, a neurosurgeon from France and Australia’s own Professor Alan Trounson are just two of the speakers at this not-to-be-missed conference.

Let me go back to ASMRs key recommendations and goals for the sector and what we have been working feverishly on.

Now, invest into the NHMRC’s MREA to mitigate the decline in the health and medical research workforce to put the sector back on a sound footing.

Longer term, to ensure the success of future investment (MRFF) by creating a predictable investment strategy for the NHMRC MREA, with the purpose of generating a sustainable health and medical research ecosystem and a well-planned workforce.

ASMR’s goal is to embed health and medical research into healthcare creating a fully integrated healthcare system. A sustainable and affordable healthcare system that all Australians deserve and can access.

Sarah Meachem
ASMR President
November 2016
AGENDA - ANNUAL GENERAL MEETING
The Australian Society for Medical Research
Bond University, Gold Coast, Queensland

Monday, November 14th 2016 commencing at 12:30pm

Dr Bree Foley

**March 30, 2016**
Dr Sarah Meachem

**Apologies: Dr Roger Yazbek,**
**Dr Demelza Ireland**
Item 1 Welcome and Apologies – Dr Phoebe Phillips

In the presence of the required quorum, in person and by proxy, Dr Phillips opened the meeting, welcoming all present and announcing apologies from Dr Andrew Burgess, Dr Rebecca Patrick, Dr Matthew Dun, Mrs Ruth Lilian and Prof Matthew Gillespie.

Item 2 Confirmation of Minutes of 18/11/14 – Dr Phoebe Phillips

Dr Sarah Meachel moved that the Minutes of the AGM of November 2014 be accepted as a true and accurate reflection of that meeting; seconded by Dr Roger Yazbek.

Item 3 President’s Report – Dr Phoebe Phillips

Dr Phillips said, “I look back over my year as the 54th ASMR President as one of the highlights of my life so far. Despite the challenges and uncertainty our sector has faced this year, I have enjoyed every minute and I am so very grateful to have had this opportunity to represent you and in the process learn so much. From the outset, my immediate goal was to implement an evidence based plan to claw back the loss of intellectual capital the sector has endured over the past 4 years following static funding into the National Health and Medical Research Council (NHMRC) and to secure the Government’s commitment to the Medical Research Future Fund (MRFF).

This year I met with many key Government stakeholders to provide evidence obtained in ASMR’s commissioned Deloitte Access Economics report that every $1 from the MRFF invested in medical research would yield returns of $3.39 in future health and productivity gains. Our report provided strong economic rationale to government not to delay the investment into the MRFF. So on the 13th of August ASMR was very pleased to see that the MRFF Bill passed through the senate. This initiative is a step in the right direction and represents a valuable long-term strategy to increase investment into health and medical research in Australia. I provided evidence at a Senate hearing on the sectors concerns about the MRFF Bill and ASMR is continuing to work with Government to ensure that the disbursement of the MRFF is a transparent process and includes expert review of all proposals. Significant delays in the expected returns from the MRFF are a concern for the sector, particularly given that the funds in the MRFF account are around $2B short of what was promised in this year’s budget papers.

It is also important for the sector to appreciate that the MRFF is to fund different but complimentary research to that currently supported by NHMRC. Based on this the success of the MRFF is heavily reliant on NHMRC investment, which has been declining in real-terms over the past 4 years. The analogy I use to illustrate the reliance of the MRFF on the NHMRC is a 2 storey house. Imagine the first storey is the NHMRC investment and the second storey is the MRFF investment. If the foundation of the first storey collapses then the second storey will surely collapse! This brings me to current federal investment into NHMRC, where over the past 4 years we have seen investment drop from 0.8% to 0.6% of the total health spend. Should the MRFF reach its predicted growth in 2018/19 of $224M investment into the sector this will still only represent 0.55% of the total health spend. In essence the status quo in terms of overall investment remains.

Last week, the Minister for health announced this year investment into NHMRC project grant and fellowship schemes. The overall investment remains static compared to last year and funded rates for project grants and all fellowship schemes is the lowest in our history.

In response to this, ASMR has recently launched a work force survey and will be preparing evidence on the effects of NHMRC static funding over the last 4 years to government. Our HMR workforce, with its spectacular track record for returns on investment is being depleted by an alarming extent and we fear our country is in danger of losing an asset which will take decades to replace. Previous investment will be lost, economic benefits jeopardized, loss of intellectual capital, the inability of a sector to maximise the opportunity created by the MRFF and most importantly negatively impact our sectors capacity to mitigate the effects of an ageing population.

Therefore, our continued ask in our advocacy campaign is that the federal government provide an immediate injection of $300 million to the NHMRC Medical Research Endowment Account. I am optimistic that with the recent political changes (new Prime Minister) and an election year is a window of opportunity for our sector.

ASMR has led several state based successful career development workshops this year and at this years national scientific conference we are running an interactive workshop on how to reveal your personality for maximum impact with expert advice from a psychologist. We will soon be launching a new ASMR website in which we will be including online training for peer review.

This year I have enjoyed strengthening ASMR’s relationships with other key stakeholders (AMA, Consumer Groups, Australian Health and Hospital Association to name a few) in order to build a strong foundation for future collaborations and facilitate ASMR’s goal of leading the discussion and strategy to embed research in the health care system and facilitate a fully integrated model of health care. ASMR has a long-term goal of ensuring this happens.

Several ASMR Directors are stepping down this year and I extend my thanks and best wishes to Dr Brian Day, Dr Antonia Pritchard, Dr Luke Hesson and Dr Andrew Burgess.

I am proud to have led a society which has 54 years of experience in advocating for health and medical research based on strong evidence and integrity. This sometimes means we take the “path less travelled” in order to achieve the best outcome not just for the sector, but for the greater good of all Australians. I am extremely grateful to all of the volunteers across the country that represent ASMR including our state committees and ASMR board. Thank you for your commitment, passion and hard work!! It really has been a privilege to work
with you all. I owe a special thanks to my mentor and ASMR past president Professor Maria Kavallaris, who backed me early in my career and gave me the courage to step up for this role. I am indebted to the support and wisdom I have received from the ASMR advisory group (consisting of past presidents Rob Ramsey, Mark Hulett, Paul Dawson, Emma Parkinson-Lawrence, Roger Yazbek and Sarah Meachem) - thank you so much!! I owe a big thanks to ASMR Director Dan Johnstone who supported me during my travels around the country during ASMR MRW®. This year I was extremely privileged to have the support of ASMR President-Elect Sarah Meachem and immediate Past-President Roger Yazbek - I thank you both for your patience, friendship and for sharing your experience!! Last but not least – all of ASMR activities would not be possible without our executive officer Cath West and Priscilla Diment who work around the clock to ensure all ASMR activities run smoothly. On behalf of ASMR and the sector thank you for all that you do. On a personal note, Cath you have been my rock throughout this year and I have learnt so much from you. I know you will continue to mentor me and be a life-long friend”. Dr Phillips concluded her report by thanking her team and her patient husband.

**Item 4 Treasurer’s Report** – Dr Roger Yazbek

Dr Yazbek congratulated Dr Phillips on her Presidency of the Society. Referring to the Financial Statements contained in the Annual Report, Dr Yazbek advised that the Society is solvent, with Net Assets of $1,100,291. He further advised that in these uncertain financial times, sponsorship is increasingly difficult and the board must remain vigilant. ASMR will be looking at new and innovative approaches moving forward. Dr Phoebe Phillips moved that the Financial Statements be accepted by the meeting; seconded by Dr Rob Ramsay.

**Item 5 ASMR Research Fund** – Dr Roger Yazbek

Dr Yazbek reported that the Research Fund has assets of $27,793 and that the ASMR continues to seek donations to support the two annual awards for early career researchers. Each year there is an opportunity for two scientists to undertake research in a laboratory outside of their home city, one international ($5000) and one domestic ($2000).

i) Award Winners 2015

Dr Kimbery Wang has won the International Award for her proposed study “Examine myosin light chain phosphorylation in airway smooth muscle”. She will visit Professor Chun Seow’s Laboratory at the University of British Colombia, Vancouver – Canada, to learn a biochemical technique refined over the years by Prof Chun’s research associate Dr Lu Wang.

Training in methods for extraction, analysis and establishing protocols for the assessment of myosin light chain phosphorylation in human airway samples. The training with Dr Lu Wang and Prof Chun will assist Kimbery to transfer this knowledge gained to her Perth Laboratory.

Dr Sivaraman Purushothuman has won the Domestic Award and will travel to A/Prof Michael Lardelli’s laboratory at the University of Adelaide. Here he will study “Understanding the relationship between the human Alzheimer’s disease-related gene RAGE and the 

abc
gene of zebrafish”. The experience gained at A/Prof Lardelli’s lab will benefit Siva with important skills in molecular biology and bioinformatics that will be shared with his colleagues at University of Sydney and Bosch Institute.

ii) Award Winner (I) 2014

S Tan Dr Yazbek introduced the 2014 International Award Winner, Stephanie Tan from the Walter and Eliza Hall Institute who gave a brief presentation around her visit to the Mahidol Vivax Research Unit in Thailand to work with Professor Jetsumon Prachumsri, Deputy Dean of Research at Mahidol University. The study was an essential stage in the development of a promising malaria vaccine candidate by translating results from pre-clinical trials of the vaccine into human systems. Miss Tan thanked the ASMR for providing this opportunity.

**Item 6 Sub-committee Reports**

a) Research Careers – Dr B Day

Dr Day thanked the Directors who have supported him throughout a challenging year where he found he had less time than expected. The funding situation is dire for health and medical researchers and there is a high level of uncertainty. Our focus has been on developing the Professional Development Day on how to ‘sell yourself’ for employment. Dr Day particularly thanked Dr Sarah Meachem and Laura Yazbek for their contribution to this program.

b) Membership – Dr Brigid Lynch

Dr Lynch advised that there are currently 1818 financial members of whom 1726 are individual members. ASMR will continue to grow the membership over the coming years. One strategy is to create an Undergraduate Student membership category which may encourage full membership as students move through their careers. The undergraduate category will receive email communications.

c) Newsletter – Dr Phoebe Phillips

Dr Phillips advised that Director Andrew Burgess was the editor this year of three quality ASMR newsletters and encouraged ASMR members to put forward ideas for articles.

d) ASMR MRW® - Dr Phoebe Phillips

Dr Phillips advised that it was a highly rewarding time visiting all states in Australia during ASMR Medical Research Week®. Despite the fiscal challenges and pressures the sector is facing – it was amazing to see our sector unite and be so enthusiastic about their research. This year ASMR Medallist, Professor Ashok Saluja, who is an example of the benefits of long-term sustained support for research. ’30 years of continuous NIH funding has resulted in a phase-1 clinical trial with a novel drug showing very encouraging results in
patients with pancreatic cancer’. Ashok did an outstanding job of advocating on our behalf to state and federal ministers on all sides of politics. ASMR is proud of our state committee volunteers who were instrumental in organising conferences in each state (>800 young researchers were given the opportunity to present their work), sold out gala dinners which provided opportunities to engage with politicians and network with senior researchers, and an exciting array of community outreach programs. ASMR Director Rebecca Patrick was convenor for the week and I would like to thank her for an outstanding job of coordinating and all state activities.

e) Media - Dr Daniel Johnstone
Dr Johnstone reported that the ASMR media portfolio is focused on traditional media to promote health and medical research and key messages. Within the year here are two peaks of major activity, one for ASMR MRW® and the other, the National Scientific Conference. We had a reasonably successful ASMR MRW® with articles and radio interviews reaching around two million people around the country. There was also some activity around the Federal Budget, the MRFF and amendments to the MRFF Bill. Media for the NSC is currently underway.

f) State Reports – Dr P Phillips
ASMR has over 100 state committee members who generously volunteer their time to organise ASMR MRW® activities and several other out-reach events and career development events outside of the week. Thank you and congratulations to all ASMR state representatives.

g) Indigenous Health Forum - Dr Phoebe Phillips
Over the past 4 years ASMR has been committed to improving health outcomes for our indigenous community. Tonight we will be holding our annual indigenous health forum in Adelaide on ‘Shining a Light on Mental health’ – all are welcome. Our community forums provide an opportunity for indigenous Australians to inform expert clinicians and health and medical researchers on what their health concerns are and have input into research. ASMR will provide recommendations to government in our continued efforts to bridge the gap and improve health outcomes for our Indigenous community. Dr Phillips thanked the Convenor, Dr Antonia Pritchard for her work in putting the program together.

h) NSC 2015 – Dr Luke Hesson
Dr Hesson, on his own behalf and that of co-convenor Dr Joanne Bowen, reported on the 54th ASMR National Scientific Conference. He thanked Dr Joanne Bowen, the Organising Committee and the ASMR Executive Office. Dr Hesson commented on the exceptional talk by the 2015 Firkin Orator, Professor Eran Elinav. He urged all to make the most of the rest of the conference in particular the AWT Edwards Orator, Professor Nick Tally, Student Breakfast, Professional Development and Indigenous Health Forum.

i) NSC 2016 – Dr Daniel Johnstone
Dr Johnstone reported that the 2016 NSC will be held in mid-November in Queensland. Planning is underway and the theme will be around next generation healthcare and the merging of technology and biology. It may be that this meeting will run over two rather than three days to reduce financial exposure.

Item 7 Other Business –
Dr Phoebe Phillips

Their being no further business, Dr Phillips handed the conduct of the Meeting to the incoming President, Dr Sarah Meachem, expressing the view that the Society is in safe hands.

Item 8 Directors and Office Bearers 2016- Dr Sarah Meachem

Dr Meachem announced Directors and Office Bearers:-

Dr Daniel Johnstone
President Elect

Dr Roger Yazbek
Hon Treasurer

Dr Phoebe Phillips

COUNCIL REPORT FOR THE YEAR ENDED 30TH JUNE 2016

The directors present the accounts of the Society for the year ended 30th June 2016.

1. The Directors of the Society at the date of this report are:

   President                        Dr Sarah Meachem
   President-Elect                  Dr Daniel Johnstone
   Exe Director/Hon Sec            Dr Phoebe Phillips
   Exe Director/Hon Treasurer      Dr Roger Yazbek
   Directors                        Dr Joanne Bowen
                                    Dr Matthew Dun
                                    Dr Brigid Lynch
                                    Dr Demelza Ireland
                                    Dr Bree Foley
                                    Dr Shyuan Ngo
   Snr Executive Officer           Catherine West

2. The principal activities of the Society during the course of the financial year were the promotion of interest and support for medical research in Australia. There were no significant changes in the nature of those activities during that period.

3. During the period the Society’s activities resulted in a consolidated operating profit in the amount of $71,507.

4. At the end of the financial year the Society had net assets of $1,305,444.

5. There were no significant changes in the state of affairs of the Society during the financial period other than as mentioned in this report. The Society’s accounting policy is on an accruals basis. Accordingly the comparative figures reflect the accruals basis of accounting.

6. During the year, events management was undertaken by ASN Events Pty Limited, on behalf of the Society. On an accruals basis, they have reported net assets of $55,922, revenue of $148,765 and a net profit of $20,002, after taking into consideration other interest income in the sum of $410.

7. This year, the Australian Health & Medical Research Congress Unit Trust reported net assets of $10,024, revenue of $241 (interest received) and a net loss of $40,217.

8. Since the end of the financial year no matter of circumstance has arisen which has significantly affected, or may significantly affect the operations of the Society, the results of those operations or the state of affairs of the Society in any subsequent financial years.

9. The Society’s branch accounting is undertaken by the National Office.

10. The financial report is a general purpose financial report that has been prepared in accordance with Accounting Standards, Australian Accounting Interpretations and other authoritative pronouncements of the Australian Accounting Standards Board and the Corporations Act 2001 (as amended). The Australian Society for Medical
Research complies with all Australian equivalents to International Financial Reporting Standards (IFRS) in their entirety.

11. Since the date of incorporation, no office bearer has received or become entitled to receive a benefit (other than a benefit included in the aggregate amount of emoluments or due and receivable by office bearers shown in the accounts or the fixed salary of a full-time employee of the Society) by reason of the contract made by the Society with the office bearer or with a firm of which he/she is a member, or with a company in which he/she has a substantial financial interest.

This report is made in accordance with a resolution of the Council.

Dr Sarah Meachem
President/Director

Dr Daniel Johnstone
President-elect

INDEPENDENT AUDIT REPORT
To the Council of THE AUSTRALIAN SOCIETY FOR MEDICAL RESEARCH A.B.N. 18 000 599 235

Scope
We have audited the financial report of The Australian Society for Medical Research for the year ending 30th June, 2016. The board of Directors are responsible for the financial report. We have conducted an independent audit of the financial report in order to express an opinion on it to the board of Directors.

Our audit has been conducted in accordance with Australian Auditing Standards to provide reasonable assurance whether the financial report is free of material misstatement. Our procedures included examination, on test basis, of evidence supporting the amount and other disclosures in the financial report, and the evaluation of accounting policies and significant accounting estimates. These procedures have been undertaken to form an opinion whether, in all material respects, the financial report is presented fairly in accordance with Accounting Standards and other mandatory professional reporting requirements so as to present a view which is consistent with our understanding of the financial position of The Australian Society for Medical Research and the results of its operations and its cash flows. The audit opinion expressed in this report has been formed on the above basis.

Qualification
The Society has determined that it is impractical to establish control over the collection of sponsorships and donations, prior to entry into its financial records. Accordingly, as the evidence available to us regarding revenue from these sources was limited, our audit procedures with respect to sponsorships and donations pledged had to be restricted to amounts recorded in the financial records.

Qualified Audit opinion
In our opinion except for the effects on the financial report of such adjustments, if any, as might have been required had the limitation on our audit procedures referred to in the qualification paragraph not existed, the financial report presents fairly in accordance with applicable Accounting Standards and other mandatory professional reporting requirements, the financial position of The Australian Society for Medical Research as at 30 June, 2016 and the results of its operations and its cash flows for the year then ended.

AUDITORS’ INDEPENDENT DECLARATION

To the Council of THE AUSTRALIAN SOCIETY FOR MEDICAL RESEARCH  A.B.N. 18 000 599 235

In relation to my audit of the financial report of The Australian Society for Medical Research for the year ended 30th June, 2016, I declare that, to the best of my knowledge and belief, that there have been:

(a) no contraventions of the auditor independence requirements of the Corporations Act 2001 (as amended) in relation to the audit; and

(b) no contravention of any applicable code of professional conduct in relation to the audit.

This declaration is in respect of The Australian Society for Medical Research during the period 1st July 2015 to 30th June, 2016.

THE AUSTRALIAN SOCIETY FOR MEDICAL RESEARCH  A.B.N.  18 000 599 235
DIRECTORS’ DECLARATION

In accordance with resolution of the Directors of THE AUSTRALIAN SOCIETY FOR MEDICAL RESEARCH, we state that in the opinion of the Directors;

(a) the Consolidated Profit and Loss Statement and Other Profit and Loss Statements of the Australian Society for Medical Research are drawn up so as to give a true and fair view of the results of the Society for the year ended 30th June, 2016.

(b) the Consolidated Balance Sheet of the Australian Society for Medical Research are drawn up so as to give a true and fair view of the state of affairs of the Society as at 30th June, 2016; and

(c) there are reasonable grounds to believe that the Australian Society for Medical Research will be able to pay its debts as and when they fall due.

In the opinion of the Directors, the Society is not a reporting entity and the accounts of the Society have been made out as a General Purpose Financial Report in accordance with the policies set out in Note 1.

This Statement is made in accordance with the resolution of the Board of Directors and is signed for and on behalf of the directors by:

ON BEHALF OF THE BOARD

Dr Sarah Meachem  
President/Director

Dr Daniel Johnstone  
President-elect

Note 1: Statement of Significant Accounting Policies
The financial report is a general purpose financial report that has been prepared in accordance with Accounting Standards (AASBs), Australian Accounting Interpretations and other authoritative pronouncements of the Australian Accounting Standards Board and the Corporations Act 2001 (as amended).
The following is a summary of the material accounting policies adopted by the economic entity in the preparation of the financial report. The accounting policies have been consistently applied, unless otherwise stated.

(A) Going Concern
The Society's financial statements have been prepared on a going concern basis. At 30th June, 2016, the Society had an excess of current assets over current liabilities. Cash reserves were sufficient to support the Societies operations.

(B) Basis of Preparation
Australian Equivalents to International Financial Reporting Standards
The Australian Society of Medical Research has prepared financial statements in accordance with the Australian equivalents to International Financial Reporting Standards (IFRS).
The accounting policies set out below have been consistently applied to all years presented. The entities have however elected to adopt exemptions available under AASB 1 relating to AASB 132: Financial Instruments: Disclosure and Presentation, and AASB 139: Financial Instruments: Recognition and Measurement.

Reporting Basis and Conventions
The financial report has been prepared on an accruals basis and is based on historical costs modified by the revaluation of selected non-current assets, and financial assets and financial liabilities for which the fair value basis of accounting has been applied, if applicable.

Functional and Presentation Currency
The Society’s financial statements are presented in Australian Dollars.

(C) Accounting Policies
Income tax
As the Society is a charitable institution in terms of subsection 50-5 of the Income Tax Assessment Act, 1997, as amended, it is exempt from paying income tax.

Property, Plant and Equipment
The Property (Suite 702, 37 Bligh Street, Sydney) valuation was reviewed by Brian Dowling Commercial Real Estate Agents. The Agent noted an estimated increase in valuation of $133,646. This material increase was factored into the 2016 Audited Financial Accounts by the Directors. Such growth is noted in the third year that the Society has owned the Property Suite.
The Society did not purchase any office equipment during the year. Office equipment is carried at cost value less, where applicable, any accumulated depreciation and impairment losses. The carrying amount of office equipment is reviewed annually to ensure it is not in excess of the recoverable amount from those assets.
Subsequent costs are included in the asset's carrying amount recognised as a separate asset, as appropriate, only when it is probable that the future economic benefits associated with the item will flow to the company and the cost of the item can be measured reliably. All other repairs and maintenance are charged to the income statement during the financial period in which they are incurred.
The Australian Society for Medical Research is a non profit organisation and there are no changes to its current disclosure requirements under AASB 116 para Aus 77.1.

Depreciation
Depreciation is recognised in the profit and loss on a diminishing basis over the estimated useful life of each asset. The depreciation rate for the current 2016 year and 2015 comparative year are as follows:-

<table>
<thead>
<tr>
<th>Depreciation Rate</th>
</tr>
</thead>
<tbody>
<tr>
<td>Office Equipment</td>
</tr>
<tr>
<td>20% - 40%</td>
</tr>
</tbody>
</table>

Impairment of Assets
At each reporting date, the directors review the carrying values of its tangible and intangible assets to determine whether there is any indication that those assets have been impaired. If such an indication exists, the recoverable amount of the asset, being the higher of the assets fair value less costs to sell and value in use, is compared to the asset's carrying value.
Any excess of the assets carrying value over its recoverable amount is expensed to the income statement. Where it is not possible to estimate the recoverable amount of an individual asset, an estimate is made of the recoverable amount of the cash-generating unit to which the asset belongs.

Investments in Associates
Any Investments in associate companies are recognised in the financial statements by applying the equity method of accounting. The equity method of accounting recognises the company's share of post-acquisition reserves of its associates. The company's interests in joint venture entities are brought to account using the cost method.
Members Liability
The Society is limited by guarantee. Every member of the Society undertakes to contribute to the assets of the Society in the event of the same being wound up during the time that he or she is a member or within one year afterwards for payment of the debts and liabilities of the Society contracted before the time at which he or she ceases to be a member and of the costs, charges and expenses of winding up the same and for the adjustment of the rights of the contributors amongst themselves such amount as may be required not exceeding the sum of $20.

Sponsorship
Sponsorship revenue is recognised at the time the pledge is made.

Provisions
Provisions are recognised when The Australian Society of Medical Research has a legal or constructive obligation, as a result of past events, for which it is probable that the outflow of economic benefit will result and that the outflow can be measured reliably.

Cash and Cash Equivalents
Cash and Cash Equivalents includes cash on hand, deposits held at call with banks or financial institutions, other short term highly liquid investments with original maturities of twelve months or less, and bank overdrafts. Bank overdrafts are shown within short term borrowings in current liabilities on the balance sheet.

Revenue
Interest revenue is recognised on a proportional basis taking in to account the interest rates applicable to the financial assets.

All revenue is stated net of the amount of goods and services tax (GST).

Goods and Service Tax (GST)
Revenues, expenses and assets are recognised net of the amount of GST, except where the amount of GST incurred is not recoverable from the Australian Taxation Office. In these circumstances, the GST is recognised as part of the cost of acquisition of the asset or as part of an item of the expense. Receivables and payables in the balance sheet are shown inclusive of GST. Cash flows are presented in the cash flow statement on a gross basis, except for the GST component of investing and financing activities, which are disclosed as operating cash flows.

Comparative Figures
Where required by Accounting Standards comparative figures have been adjusted to conform with changes in presentation for the current financial year.

Critical accounting estimates and judgments
The directors evaluate estimates and judgments incorporated into the financial report based on historical knowledge and best available current information. Estimates assume a reasonable expectation of future events and are based on current trends and economic data, obtained both externally and internally.

Key estimates - Impairment
The directors assess impairment at each reporting date by evaluating conditions specific to the group that may lead to impairment of assets. Where an impairment trigger exists, the recoverable amount of the asset is determined. Value-in-use calculations performed in assessing recoverable amounts incorporate a number of key estimates.

Agency Agreement
The Society has entered into an Agency Agreement with ASN Pty Ltd. From the Society’s perspective, there is no change in the way ASN Pty Ltd manage events for the Society.

</tbody>
</table>

Note: 5 Effect of Changes in Accounting Policy
The entity has adopted the following Accounting Standards:-
- AASB 132: Financial Instruments: Disclosure and Presentation
- AASB 139: Financial Instruments: Recognition and Measurement
AASB 132 relates primarily to increased disclosures required under the standard and does not affect the value of amounts reported in the financial statements.

</table>

**Note 1. Reconciliation of Cash**

For the purposes of the statement of cash flows, cash includes cash on hand and in banks and investments in money market instruments, net of any outstanding bank overdrafts. Cash at the end of the year as shown in the statement of cash flows is reconciled to the related items in the balance sheet as follows:

<table>
<thead>
<tr>
<th>Item</th>
<th>2016</th>
<th>2015</th>
</tr>
</thead>
<tbody>
<tr>
<td>Deposit Account</td>
<td>200,611</td>
<td>195,418</td>
</tr>
<tr>
<td>Cash at Bank - General Account</td>
<td>236,882</td>
<td>184,362</td>
</tr>
<tr>
<td>Funds at call - Cash Management</td>
<td>377,012</td>
<td>374,811</td>
</tr>
<tr>
<td>Cash on hand</td>
<td>100</td>
<td>100</td>
</tr>
<tr>
<td><strong>Cash at the end of the year</strong></td>
<td>814,605</td>
<td>754,691</td>
</tr>
</tbody>
</table>

**Note 2. Reconciliation of Net Cash Provided by/(used in) operating Activities from operating profit**

<table>
<thead>
<tr>
<th>Item</th>
<th>2016</th>
<th>2015</th>
</tr>
</thead>
<tbody>
<tr>
<td>Operating profit/(loss)</td>
<td>71,507</td>
